

Nanoparticles for use in toxicology experiments

Guaranteed sterile and endotoxin-free

Tested for endotoxin levels and are confirmed to be below 2.5 EU/mL; sterilized before final packaging

Extensively washed to remove residual reactants

Purified to remove 99.99% of residual reactants for use in biological applications

Wide variety of surfaces

Available in a variety of standard surfaces such as citrate, PVP, tannic acid, PEG, lipoic acid, BPEI, or custom surfaces

Narrow size distribution

Discrete sizes with coefficient of variation of < 15% for most sizes

Highly concentrated

Available at 1 mg/mL to allow for easy dilution into any solvent or system

 **BioPure**
