

Product Data Sheet

Sample name:

AB79-E11 (anti- SARS-CoV-2 nucleocapsid protein (N-protein))

Product No:

ABK79-E11-M

Sample type:

Monoclonal recombinant mouse IgG2a antibody, animal free

Sample Origin:

This product was made using human naïve gene libraries and phage display technology.

Expression Host:

EXPI293 cells (transient expression)

Physical state:

liquid

Buffer:

PBS (pH 7.4); does not contain stabilizers and preservatives.

Storage:

Store for up to one month at 4 °C. Shipped on Dry Ice. For long term storage, prepare upon arrival single use aliquots and store between - 20 and - 80 °C.

Avoid thawing/freezing cycles.

Please handle under sterile conditions to avoid contamination.

Purity:

The recombinant antibody was purified from EXPI293 production supernatant by Protein A.

Reactivity:

Anti-SARS-CoV-2 N-protein antibodies react with MTP-coated as well as soluble N-protein of SARS-CoV-2.

Note:

For research and in vitro use only! Not for diagnostic or therapeutic use.
