

KRISHGEN BioSystems

Bioprocess Contamination Assays

KRIBIOLISA™ is an effort to provide the tools as aid to the biopharmaceutical industry after 2 years of in-house product development. These kits are manufactured by us using contaminants which are generic in nature.

“KRIBIOLISA™” is the bioprocess contamination products range . These are ELISAs in 96 well format with convenience of break-apart strips.

- KRIBIOLISA™ E.coli HCP ELISA
- KRIBIOLISA™ Pichia *Pastoris* HCP ELISA
- KRIBIOLISA™ CHO HCP ELISA
- Ovalbumin ELISA
- Human Serum Albumin ELISA
- KRIBIOLISA™ Human IgG ELISA
- KRIBIOLISA™ Human IgA ELISA
- Bovine Serum Albumin ELISA
- Protein A ELISA

Key Features

- Priced competitively; available with shorter lead times & good product support.
- ELISA with 8 x 12 break-apart strips
- Simple procedural steps for running the Assay.
- Results available within 3 hours hands-on time.

All our kits now carry the *Gold Quality Ring* with 5 stars as a mark of our Quality Assurance. An assurance from us on the quality of our kits and the vigorous validation and QC protocols they follow before they are released for sale.
