

The CUTANA CUT&RUN Kit Stands Out From The Rest

Component	EpiCypher	Competitor A	Competitor B
Controls	- Control Antibody	IgG	IgG
	+ Control Antibody	H3K4me3	H3K27me3
	Assay Control	Nucleosome Spike-ins	✗
	DNA Normalization	E.coli Spike-in DNA	Yeast Spike-in DNA
Added Features	Includes DNA Purification reagents	✓	✗
	Optimized Library Prep Kit available for purchase	✓	✗
Features & Advantages	48 reactions £15/rxn	24 reactions £25/rxn	24 reactions >£35/rxn

- Extensively optimized for high throughput & user-friendly CUT&RUN assays
- Robust data down to 5,000 cells
- Rigorous functional validation including genome-wide analysis of diverse targets
- Highly specific CUT&RUN antibodies available

Ready to get started?

Pair our CUTANA CUT&RUN Kit and Library Prep Kit for a complete end-to-end workflow.
