

# HISTOPRIME®

Immunohistochemistry by BIOZOL

New Portfolio

## IHC Quality you can see!

- ✓ Pre-diluted and concentrated antibodies for immunohistochemistry for important human targets
- ✓ Blocking reagents and animal blocking sera made in Germany in stock and ready for next day delivery
- ✓ High quality buffer, counterstain reagents, substrates and accessory products for IHC without compromises

 **Stratech**

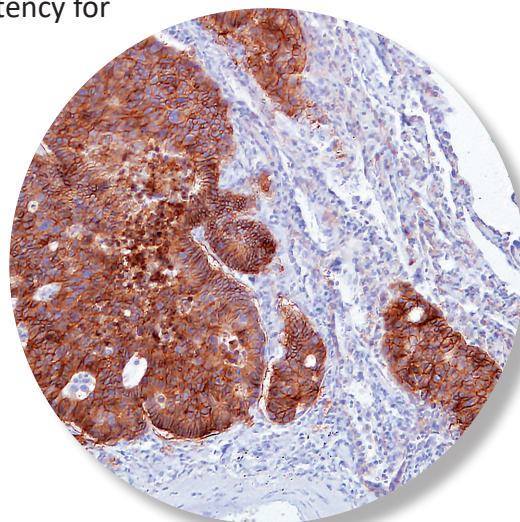

**HISTOPRIME®**  
A BIOZOL BRAND

## Antibodies for Immunohistochemistry

Chosen for uncompromising staining results and rigorously tested for highest batch to batch consistency for your optimal IHC staining.

Selected by leading pathologists to guarantee optimal performance on formalin-fixed paraffin embedded tissue, quality and reliability are the key properties.

- ✓ Pre-diluted antibodies optimized for immunohistochemistry available for important human target proteins
- ✓ Well documented reliable clones
- ✓ Optimized for best performance on FFPE tissue sections

## Pre-Treatment and Antibody Dilution Buffer for IHC

The interaction between antibodies and epitopes consists mainly of relatively weak forces such as van der Waals forces, electrostatic forces, and hydrophobic forces, which are readily disturbed by extreme pH, and ionic strength. Consequently to assure optimal performance of the antibody, the use of a proper diluent is imperative.

HISTOPRIME® HistoLongLive is the optimal Dilution Buffer for all concentrated HISTOPRIME antibodies.

Also available are standard buffers for washing and selected pre-treatment reagents.

## Animal Sera and Blocking Reagents

Histoprime blocking sera for IHC is produced in our laboratory in Germany with serum from intra-European sources. Sufficient stock is available at all times to ensure short delivery times and to overcome international supply chain problems. We also provide custom fillings and pretreatments upon request.

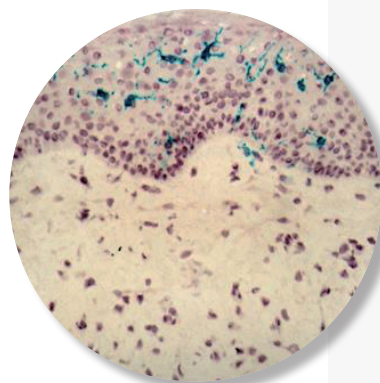

- ✓ IHC tested (FFPE and frozen)
- ✓ Manufactured in Germany
- ✓ Heat treated at 56°C
- ✓ Always in stock

## Substrates, Counterstains, Mounting & Accessory

Histoprime offers a variety of substrates for Horseradish Peroxidase and Alkaline Phosphatase such as DAB and AEC. In addition **Histogreen** is a unique Peroxidase based substrate:

- ✓ Green coloring worldwide unique!
- ✓ Compatible with HistoHaematoxylin and HistoNuklear Fast Red
- ✓ For IHC and in-situ Hybridisation
- ✓ Single and multiplex staining

Histoprime is a private label of BIOZOL GmbH for antibodies and reagents in the field of immunohistochemistry. It includes ready-to-use antibodies, concentrated antibodies, accessory reagents, including blocking reagents, and substrates.

The focus in the selection of reagents lies always on highest quality and particular suitability for immunohistochemistry, especially on formalin-fixed paraffin embedded tissue.
