

Jetbody

Beyond affinity

DISCOVERING NEW SOLUTIONS FOR LIFE SCIENCE

WHY NANOBODIES?

- Derived from camelids and sharks.
- Smallest antigen-binding fragments (12-15 kDa).
- Intrinsic advantages over conventional monoclonal antibodies.
- Versatility across a wide range of fields.

Excellent stability

Broad epitope recognition

Fast imaging turnaround

Deep tissue penetration

Ease of engineering

WHY CHOOSE US?

"It is truly a five-star experience regarding order handling, technical support, and product quality. After trying other vendors for nanobody generation, Jotbody is the one I will definitely recommend to my colleagues"

Bill Wong | VP Preclinical Development, InnoRNA

"I really appreciate your efficient, gracious service, the level of detail, professionalism, and accountability you have demonstrated on my project, and the way you conduct business as a whole."

Hua Zhang | VP and Chief Scientific Officer, SPH Biotherapeutics

"We achieved successful cell targeting using your nanobody-clicked EVs. Thanks for your continuous support - it has been great working with you"

Anna Cifuentes-Rius | Director Research & Innovation, Exopharm

OUR STRENGTHS

15+ years of bio-therapeutics expertise

Excellent Customer Support

Specialized in camelid and sharks-derived nanobodies

One-stop solution and customizable projects

Rapid Antibody Discovery Cycle

Unleash the Power of Nanobodies for Breakthrough Science
