

Simplify your test work flow and help ensure precise results every time.

A simple, low cost, low power alternative to a heat block or PCR machine for incubating up to 4 Flips at a time.

Powered from any USB-C power source, including a battery pack or even a phone, the Nest brings exceptional versatility to your test environment. An integrated timer and alarm help ensure accurate test performance.

Enabling the unrivalled speed, accuracy and simplicity of Flip tests in any location to provide results when and where you need them.
