

Matched Pair Infectious Disease Antibodies & Proteins For IVD

Leinco Technologies understands the need for reliable, high-performance IVD critical raw materials such as antibodies, proteins, and buffers. Our infectious disease antibodies and proteins catalog includes confirmed matched pairs for ELISA and Lateral Flow applications as well as cutting-edge recombinant antibodies with high specificity and sensitivity. We also offer recombinant antigens and blocking peptides to advance your infectious disease research.

Sexually Transmitted Infectious Diseases

Chlamydia	HIV	N. gonorrhoeae
CMV	HSV-1	T. pallidum
EBV	HSV-2	T. vaginalis
Group B Strep	M. genitalium	

Seasonal & Respiratory Pathogens

Adenovirus	Influenza B	SARS-CoV-2
Enterovirus D68	Rotavirus	
HMPV	RSV	
Influenza A	SARS-CoV-1	

Nosocomial Pathogens

Acinetobacter	Group A Strep	Mycobacteria
C. difficile	Hepatitis B	Norovirus
Candida	Hepatitis C	
E. coli	M. tuberculosis	

Tropical Diseases

Entamoeba	Giardia	Plasmodium
-----------	---------	------------

Emerging Infectious Diseases

B. anthracis	Listeria	Salmonella
Bundibugyo Ebola	Marburg	Shigella
Chikungunya	Mayaro	Tick-Bourne Encephalitis
Crimean-Congo Hemorrhagic Fever	Monkeypox	Usutu
Dengue	Hantavirus (Sin Nombre/Andes)	Vaccinia
Ebola	Henipavirus (Nipha)	West Nile
EEEV	Powassan	Yellow Fever
JEV	Rickettsia	Zika
